See below.

DECLASSIFIED AND RELEASED BY CENTRAL INTELLIGENCE ABENCY SOURCES METHODS EXEMPTION 3028 NAZI WAR CRIMES DISCLOSURE ACT DATE 2007

A. BOFW 11425, 14 Cotober 1960 B. DIR 10125

## 1. Introduction.

We appreciate Meadquarters recommendation contained in para 4e of Reference A that we not initiate a system of monthly reporting on progress of this operation, but that we rely on full and timely substantive reporting as operational or administrative matters arise. We will accept this opportunity therefore and will limit our progress reporting to quarterly reports, of which this is the first. We have adopted the normal progress report format because we feel that it will cover all of the points which we will wish to report. If Headquarters desires us to change or add to any part of this format, we will be most willing to adjust.

### 2. Susmery.

We have been engaged with Project AMRODYNAMIC, specifically with the ABCASSCWARIES, for about three menths. We have met and had discussions with both AECASSCWARY 2 and ABCASSCWARY 29, and feel that the fundamental agreements which were required for a project of this type have been accomplished with a minimum of pulling and hauling. We have been involved in the Hamburg International Law Association Conference, the Stockholm International Congress of Historical Sciences, the Reme ZEMANCE and the Warseille Fair. Reports on these activities have been forwarded separately to Meadquarters. From an administrative point of view, we are still in process of establishing AECASSOWARY 29 in Germany under his unofficial cover. He has applied for a visa extension, since his first visa expired on 7 Movember 1950, but has not yet been notified that it has been granted. AECASSOWARY 2 has introduced AECASSOWARY 29 to the senior representatives of AECASSOWARY 1 in France, England, Germany and Italy, and AECASSOWARY 29 has met the leaders in Sweden. We are now in the process of clearing and selecting a small group of spotters to develop REDSKIN leads for AECASSCWARY 29. We are also in the process of exploiting SHPORLIUK's decision to remain in the West.

#### 3. Action Required.

None.

# 4. Production in Toyans of Froject or Intelligence Descritions.

a. We have reported the activities at the Hamburg International
Law Association Conference in KGFA-31920, 30 September 1980. We believe that
this exercise was useful in that so did develop further information on certain
personality targets and in were able to see first hand how this type of openation could be conducted. Vafortanately we did not produce positive intelligance
in response to requirements. The Stockholm International Congress of Historical

7

Sciences was configered under the supervision of the [ and the reports written by AECASSUNARY 29 have been forwarded to Headquarters. Further information was developed on personality targets and we were informed by ANCASSOWARY 29 that some positive intelligence was produced. The ZMMANCE operation was conducted under the control and supervision of a Headquarter's case officer and the reports written by AECASSOWARY 29 in Ukrainian were forwarded directly from [ ] to Head-quarters. The Headquarters case officer informed us that the performance of AECASSOMATY 2, AECASSOMARY 29 and their collaborators was quite good and that certain results were obtained which were passed to the [ ARCASSOWARY 29 participated in the Marseille Fair operation under the supervision of the and his reports were forwarded to Headquarters directly. We have discussed these activities briefly with AECASSOWARY 29, but we have not asked him to duplicate the reports here. Although we have not been able to watch and assess ABCASSOWARY 29's operational ability first hand, we feel that the past activity has served the purpose of providing further experience for him and developing certain basic principles which will guide our future activity.

- b. AECASSOWARY 29 has completed his tour with AECASSOWARY 2 to Prance, Italy and England for the purpose of being introduced to the senior representatives of AROASSOWARY 1 in these areas, being provided with the proper bona fides and being guaranteed the proper type of support from AECASSOWARY 1 collaborators. AECASSOWARY 29 has made an assessment of the operational potential in these areas for flowing activity. He has decided that Italy does not have a sufficient potential to varyant special efforts from Frankfurt. We have already presented to Headquartors, in ECFA-32524, our thinking in commetion with unthebevel operations in England. In light of the policy of conducting such operations in Hagland, as we understand it, we have instructed AECASSOWARY 2) to undertake no operational activity there for the present time. AECASSCHEE 29 feels that there is sufficient potential in Austria to warrant a survey trip to Vienna to most and discuss the problem with AECASSOWARY 1 collaborators there. However, we have decided to postpone his trip for the next fow months in order to concentrate on the operational potential in Gentuary. We will inform Headquarters and the Vierna Station at the proper time and will then determine whether direct contact between ARCASSOWARY 29 and the Vienna Station is desirable. We have selected certain individuals in Sweden, France and Germany as spotters and are in process of obtaining elegrances for operational purposes. We will continue to emphasize establishing spotters in Germany, but intend to keep the number at a minimum in order to avoid an impossible workload of contacting and maintaining them.
- c. AMOASSOWARY 29 has received a few loads already, but we have asked for traces on only two: FROB 8084 and FROB 8091. Both of these loads are outside Germany. When we receive FOA's on these leads, we will determine whether an operational plan can be developed which will be forwarded to Headquarters for concurrence. As further leads are developed, particularity in Germany, we will chercise a high degree of selectivity in order to develop only the most potentially productive operations.

#### 5. Agent Performance.

a. AECARSCARM 29 has cooperated with us very well in all of the matters that we have undertaken to date. He has willingly assumed all the purely administrative chores in order to become established in Germany and to establish an egerational basis for our activities in terms of safehouse, safes, typewriters, etc. He realizes that he must be selfsufficient in order to make the relationship work properly. He seems to

adan - Rehed

have the shiling to need theopersontly without required; a great deal of support or pasking to get things done.

- b. On operation is administrative mutters he had usue up to expectation in all incide except reporting, which we are still emphasizing. We expect that in the not too distant factor he will extern the level of reporting desired. We believe that ARCASHRARI 29 has been well trained in according and, with the exception of Edentity of DIR 10128, has shown an appreciation for these matters.
- c. In our discussion of the various conformates and the SMFORLIUM case, AECASSCMARY 29 has shown ability in the understanding and planning of these types of operations. We have discussed mounted N-DEMIN operations into the USSR only in theory since we have not yet had an actual case to plan and execute. However, we believe that AUCASSCMARY 29 has the basic principles well in sind and should be able to conduct these operations in a professional manner.

#### 6. Finance and Administration.

**a.** During the first three meaths of our project the empenditures have been especially here; on the eventual side and not too much on the operational side. We expect that this will change than the project has been firmly set up and then the expenditures have harded out to a reasonable proportion of the project Field Approval. We have broken down all our supenditures in the following toble which will out a Field superiors in planning the funding for the future:

	Crevel.	Yes Mich		Gyonhoud
Heatury (AECASSCHARY H)	269,50	• '	127,30	***
Stockholm (AECASSOWIE 29)	652.15	647.38	5334.83	499
Paris, London (Mexacillia)	1062,22	J131/15	755.07	en en
Frankfurð	1983.92	en e	47.95 ************************************	2000.00
Rose (T/A ZROAKOK)	398,60	827.12	<b>3</b> 3.88	92r

Thus, our total Project expenditures to the end of Outcour is EM 8,205.38, which does not include EM 1587.39 for the EMPANCE operation which was TA'S to Headquarters. We have calculated on the backs of only the Stockholm operation and the Paris-Mondon trip, including Marchille operation, that we might expect approximately 20% of expenditures would be expended for travel, 43% would be for operational expenses. We estimate that the resoluting 8% would be for evertised including the make operation. These are the most testable percentages and we feel that charges will occur depending upon each type of travel and spervious.

b. AMSE-TAILS TO have eponed Account to 1909 in the American Lapunes Oo., [4,15,16]. No efficient webs 25, Frontsfort A. Fair improvement a should be passed to efficient the section or they origin, and the improvement of the testions M.B.M., since this will distinguish this beside of the American Empress Company from the other branch which is for Account an Alexandra personnel. We presume that AMERICAN DISTRICT THE STATE AND AMERICAN AMERIC

here and knows that the sums paid by AHCASSCWARY I into this account may be the basis upon which the tax is paid. We would be interested in knowing how the decision on the double taxation problem is being resolved.

- c. We have monitioned above that we have raised the per diem rate for AECASSOWARY 29, in response to Headquarters request, to the level of that given a staff officer. We have no real objections to this level and we know that it will make AECASSOWARY 29's existence here easier. This relieves us of the worry about his personal finances, but it does increase our Project expenditures for for diem by about one—third.
- d. We have come to an agreement with ATCASSCWARY 29 about the cost of the safehouse. We will pay half the rent, and he will pay half the rent and the utilities. We have provided the Kaution money of one month's rent, which we will regain, and the fee to the real estate agent of one month's rent.
- e. AECASSCMARY 29 has cooperated very well in preparing his accountings and we feel that this is an administrative burden which we can shift onto his shoulders. He prepares the accountings on a special form we have prepared and then we review the expenses together. He is operating against an advance of DM 2,000 which is maintained by reimbursing this advance as he presents his expense vouchers. We feel that a minimum of time is devoted to financial problems in accounting.
- f. From an administrative point of view, we are still in the process of legalizing ABCASSOWARY 29's residence in Germany. He has registered with the Frankfurt Police and has applied through them for an extension of his visa. These actions were precluded earlier because ALMASSOWARY 29 was engaged in the Stockholm and ZEDANCE operations and the survey trip with AECASSOWARY 2. His late registration with the police created no questions at all, particularly since he was required to have a fixed address before he could register. The visa which AECASSCHARY 25 procured from the German Consul in New York was granted with the deadline set on the basis that AECASSOMARY 29 guaranteed that he would leave Generaly in three months, and that he had actually purchased a return trip ticket. The General Consul did not, therefore, apply as is normally required to the local German authorities in any city in Germany for permission to great a visa for a longer period. Therefore, the Frankfurt AusländersAmt must make its own decision now as to shother ACCASSOWARY 29 may or may not remain. ARCASSOWARY 29 applied for the extension of his visa at least three weeks before the expiration date, but has received no answer to date. He has shocked every two or three days and has been informed by the Frankfurt Austlindershut not to worry about the fact that his visa has expired. He has been teld unofficially that he would probably receive a view extension. AECAS SCHARY 29 applied for the extension on the grounds that he had been surveying the area from the point of view of his research progress, and has determined that there is sufficient material in Germany to continue his research for at least a year. We have deliberately had AECASSOWARY 29 follow this procedure through himself in order to keep the PBPRIME hand out of it and also to determine what difficulties might be experienced in establishing a stateless individual under an unofficial cover here in Germany.

#### 7. Commitments.

Artika Brok usuk pro Mark Artis

- a. AECA MODALY 29 understands that a considerant has been made that his tour of duty in Burge will count as time in residence in UEFFILM for purposes of FEFFILM citizenship and that IFS has agreed to this fact.
- b. ARCAGSOWER 29 is aware of the problem of double texation and knows that Headquarters is attempting to resolve this problem. No commitment

SECRET

35

randario de la companya de la compan

for reimbursement of these taxes by KUBARK has been made, but we presume that a commitment will be made when the problem is resolved.

c. No other commitments have been made.

#### 8. Security.

- a. We believe that full security has been maintained in this operation and that there have been no security breaches. We have instructed ABCASSCWARY 29 that we can expect the RIS to step up its compaign against the emigre groups and individuals in the future and that extra precautions should be taken by him against this increased threat. We have asked ABCASSCWARY 29 to keep his contacts of a non-operational nature to a minimum consistent with his cover so that his presence in Europe will not become a matter of widespread knowledge and speculation. We have asked ABCASSCWARY 29 to report to us the names and biographical data of all persons he contacts in connection with operations so that we may run preliminary twices in order to become aware of any socurity problems that might units in this connection. We have tried to point out to AECASSCWARY 29 whome we free the weakest country in this type of operation lies so that we can pay special attention to these.
- b. We have reported in EGFA-32348, 2 Nevember 1960, that an accommodation address has been used improperly by AMELIEUVS in New York. Our examination of the envelope with MWTOPAZ resulted in the opinion that the letter had not been penetrated, but MWTOPAZ could not guarantee this. We are now awaiting for the arrival of the two test letters before we decide whether or not to discard this address.
- o. We have enlegted a German-made safe with a three number combination look for use is the safe spartwent. Liter several discussions with Security and MEDFAR, we have decided that the cytimum consealment device for this wafe will be a Cerean-made four driver metal cubinet with bunkley look. The bottom two divident will be discussibled so that the front of these drawers can be welded together and hinged at the bottom to drop forward upon release of a special critic. When the trop door is closed and the top two drawers are closed and locked, the cabinet will look like an excinary file cabinet which a journalist-researcher might have to keep his papers in order. The safe will fit in behind those two drawer fronto and will be wolded in place so that it would be necessary to remove the whole file cabinet in order to remove the safe. Since the embination of safe and cabinet will weigh over 200 pounds, we doubt that this respond would be possible. This safe will be used to store non-consitive materials only. No KUETHK naterials will be hald there at all and the sensitive ANCASSCWARY I exterials will be stored in KUBARK files unless there is actual meed for them on a temporary basis. We feel that we will reduce the risk of losing sencitive meterials to the opposition to an acceptable level by this precaution. The safe itself has passed the tests which Security has imposed. We will forward photographs of these when they are available.
- d. Our most serious security problem to date is the situation involving Identity of DIM 10124. We have reported our thinking on the matter in MCFA-32353 and FROB 8178. We believed that AECASSOWARY 2 should have informed Headquarters of this situation when he first learned of it from AECASSOWARY 29. Both AECASSOWARY 2 and AMMASSOWARY 29 should know that it is impossible to separate a private life complicately from operational activity and that a private life has a direct bearing upon security of operations. We are disappointed that AECASSOWARY 29 did not inform us of the situation before it materialized. We have no illustrate that AECASSOWARY 29's statements that this situation will not interfere with our operational activities resolves the problem that easily. However, we believe that we can live with the situation if we take whatever special procautions are

Of a Tamber commen.
Alto and founds
Alto Leson and Seen
Balva and Orcolate.

13.2.3.4.7.5.2.3

required, improse on FEONSEMMER 29 the seriousness of security implications and then observe the developments as constitution as pertible. We must be kept aware of any changes in this bituation, whether in MERINE or in the and we will, of course, keep Feadquarters informed.

## 9. Prospective Developments and Planning.

We intend to develop this operation primarily in Germany. We feel there are sufficient operbunities for NEDSKIN activities emong the Ukrainians and Correct here to occupy our full time. This type of opention will require less coordination and amangement thru attempting to develop and coordinate very energious in France, Sweden and Angland. We believe that it is more important to concentrate on a few good egopetions in Germany and prove the basic value of this concept of utilizing onigre potential than to spreed our efforts ever too wide a field. Therefore, we have instructed ANCASSOWARY 29 to restrict his activities to Romary will we have originated and developed in Ceremp two or three mounted MDFTE operations into the . USSR to the point where in agent is recruited and life bricking has begun. At this chage then we will have proved the value of this concept and con consider applying the concept to other areas. This will not proclude, hereever, our undertrising special cases in other excess at the present time when no other KUBARK element sen handle it and whom time is an important consideration. These special cases would be at Headquarters direction; such as the SHPORLIUM case. As we lagin to enlarge our area of notivity later on, no will will ensure full cooperation and coordination with all elements concerned.
